The overflow Property

The overflow property specifies whether to clip content or to add scrollbars when an element's content is too big to fit in a specified area.

- div.ex1 { background-color: lightblue; width: 200px; height: 220px; overflow: scroll; }
- div.ex2 { background-color: lightblue; width: 200px; height: 220px; overflow: hidden; }
- div.ex3 { background-color: lightblue; width: 200px; height: 220px; overflow: auto; }
- div.ex4 { background-color: lightblue; width: 200px; height: 220px; overflow: visible; }
- span.internalScroll { background-color: magenta; overflow: scroll; }
- span.internalAuto { background-color: magenta; overflow: auto; }
- span.internalHidden { background-color: magenta; overflow: hidden; }
- span.internalVisible { background-color: magenta; overflow: visible; }

overflow: scroll for div,

internal span Scroll: Some text is herehereherehereherehereherehhhhhl1 and herehereherehereherehereherehhhhhl should be magenta color for internal span, lightblue for parent div

internal span Auto: Some text is herehereherehereherehereherehhhhhl1 and herehereherehereherehereherehhhhhl should be magenta color for internal span, lightblue for parent div

internal span Hidden: Some text is herehereherehereherehereherehhhhhl1 and herehereherehereherehereherehhhhhl should be magenta color for internal span, lightblue for parent div

internal span Visible: Some text is herehereherehereherehereherehhhhh1 and herehereherehereherehereherehhhhh should be magenta color for internal span, lightblue for parent div

overflow: hidden:

internal span Scroll: Some text is herehereherehereherehereherehhhhh1 and herehereherehereherehereherehhhhh should be magenta color for internal span, lightblue for parent div

internal span Auto: Some text is herehereherehereherehereherehhhhh1 and herehereherehereherehereherehhhhh should be magenta color for internal span, lightblue for parent div

internal span Hidden: Some text is herehereherehereherehereherehhhhh1 and herehereherehereherehereherehhhhh should be magenta color for internal span, lightblue for parent div

internal span Visible: <mark style="background:magenta">Some text is herehereherehereherehereherehhhhh1 and herehereherehereherehereherehhhhh1</mark> should be magenta color for internal span, lightblue for parent div

overflow: auto:

internal span Scroll: <mark style="background:magenta">Some text is herehereherehereherehereherehhhhh1 and herehereherehereherehereherehhhhh1</mark> should be magenta color for internal span, lightblue for parent div

internal span Auto: <mark style="background:magenta">Some text is herehereherehereherehereherehhhhh1 and herehereherehereherehereherehhhhh1</mark> should be magenta color for internal span, lightblue for parent div

internal span Hidden: <mark style="background:magenta">Some text is herehereherehereherehereherehhhhh1 and herehereherehereherehereherehhhhh1</mark> should be magenta color for internal span, lightblue for parent div

internal span Visible: Some text is hereherehereherehereherehhhhl 1 and hereherehereherehereherehhhhl should be magenta color for internal span, lightblue for parent div

overflow: visible (default):

internal span Scroll: Some text is hereherehereherehereherehhhhhhhh 1 and hereherehereherehereherehhhhhhhh should be magenta color for internal span, lightblue for parent div

internal span Auto: Some text is hereherehereherehereherehhhhhhhh 1 and hereherehereherehereherehhhhhhhh should be magenta color for internal span, lightblue for parent div

internal span Hidden: Some text is hereherehereherehereherehhhhhhhh 1 and hereherehereherehereherehhhhhhhh should be magenta color for

internal span, lightblue for parent div

internal span Visible: Some text is herehereherehereherehereherehhhhhhhh 1 and herehereherehereherehereherehhhhhhhh should be magenta color for internal span, lightblue for parent div
